

Will the medications **Cialis®** or **Myrbetriq®** improve my metabolism?

Researchers at the University of Kentucky want to determine whether the “erectile dysfunction drug” **Cialis®**(tadalafil) or the “overactive-bladder drug” **Myrbetriq®**(mirabegron) will improve blood sugar and metabolism.

You may be eligible for this research study if you are:

- Overweight (BMI more than 27)
- Age 35-65 years old
- Are not on medications for diabetes
- Have not had a previous heart attack or severe heart condition

Participants will receive compensation for their time.
