Asthma Volunteers Needed for Research Study

Researchers at the University of Kentucky Department of Internal Medicine are conducting a clinical research study to examine the impact of hot and humid air upon lung function of patients with mild to moderate asthma. Your participation will require up to five separate days to complete the study, and you will be compensated for your time.

You may be eligible for this study if you:

- are between 18 to 65 years of age;
- are not currently pregnant;
- are able to perform lung function testing;
- have stable enough asthma to stop therapy one week prior to the study;
- have not had an asthma attack in the past month;
- have not taken any oral steroids in the past month;
- are not on any oral steroids at the time of study;
- are fluent in the English language;
- have no other lung disease other than asthma;
- have no history of tobacco smoking;
- have no allergy to ipratropium bromide (also known as atrovent™).

Research Investigator for this study are M. Khosravi, MD and L.Y. Lee, PhD.
