Allergic Rhinitis Volunteers Needed for Research Study

Researchers at the University of Kentucky Department of Internal Medicine are conducting a clinical research study to examine the impact of hot and humid air upon lung function of patients with allergic rhinitis. Your participation will require up to five separate days to complete the study, and you will be compensated for your time.

You may be eligible for this study if you:

• are between 18 to 65 years of age;
• are not currently pregnant;
• are able to perform lung function testing;
• have a history of allergic rhinitis;
• will not and have not taken any oral steroids in the past month;
• are fluent in the English language;
• have no other lung disease other than allergic rhinitis;
• have no history of tobacco smoking;
• have no allergy to ipratropium bromide (also known as atrovent™).

Research Investigator for this study are M. Khosravi, MD and L.Y. Lee, PhD.
