Do You Have Asthma?

Researchers at the University of Kentucky Department of Microbiology and Immunology are conducting a clinical research study to examine the regulatory T cell function in patients with mild to moderate asthma. Your participation will require 2 separate visits in 2 months (1 per month) to UK to complete the study, and you will be compensated for your time.

You may be eligible for this study if you:

- are between 18 to 35 years of age;
- are not currently pregnant;
- are not taking any form of oral contraceptive;
- are able to perform lung function testing;
- are not taking systemic or nasal antihistamines 5 days prior to study;
- are not taking tricyclic antidepressant;
- are not on any oral steroids at the time of the study;
- are fluent in the English language;
- have no lung disease other than asthma; and
- have no history of tobacco smoking.
