Do You Have Gout With a History of Cardiovascular or Cerebrovascular Disease?

Researchers at the University of Kentucky Division of Rheumatology are conducting a research study to compare the safety of medications on participants that have gout, along with a history of cardiovascular or cerebrovascular diseases.

You may be eligible for this research study if you:

- are a male 50 and older;
- are a female 55 and older and are post-menopausal;
- have a cardiac risk (e.g., progressive diabetes mellitus); and
- have acute arthritis with redness over joints.

Participants may be compensated for their time and travel.
