## Request for Applications:

# Substance Use Disorder Trainee and Student Travel Awards

The Center for Clinical and Translational Science at the University of Kentucky is soliciting applications for travel awards from Substance Use Disorder involved trainees and learners to support attendance and presentation at important SUD-related scientific and professional conferences during 2023-2024. The purpose of this call is to support meritorious travel award applications that involve translational SUD research, to promote and support the “bench to bedside to community” goal of the National Institutes of Health and National Center for Advancing Translational Science (NCATS). It is anticipated that travel funds **up to \$1,500** per awardee will be available. Applicants who have received an SUD travel award in the past 24 months are not eligible to apply.

Applicants will be required to submit their conference abstract and a letter of request showing the need for travel funding. Candidate meetings that are important in the SUD space will be prioritized, for example, SFN, CPDD, APA, SRNT, AHSR, and ICRS.
