

## Interested in your child eating healthier foods?

Researchers at the University of Kentucky are inviting children to join a research study to learn about eating healthy fruits and vegetables. Your child will be asked to participate in 3 educational sessions with a dietitian. The initial session will be in person at the University of Kentucky Northfork Valley Clinic in Hazard, KY. The following sessions can either be in person or via telecommunications application such as Zoom. Your child will be asked to complete a survey at each session, which will be read to them. The survey will ask questions about the frequency in which they consume fruits and vegetables.

### **Your child may be eligible for this research study if they:**

- Live in Breathitt, Knott, or Perry County
- Are Age 6 to 17 years old

### **What will you receive for participation in research study?**

- Your child will receive tokens at each visit which can be used at Farmers' Markets in Breathitt, Knott or Perry Counties.

**Scan QR code to see research study.**
