

Harmony at H.O.M.E

Help Online Modifying the
Environment

Why Participate

This research study is for adults with memory loss and dementia living at home in rural Kentucky with their caregivers.

The study will provide one-on-one support and training to care partners through telehealth in order to improve functional behaviors in the home environment for the person with dementia. If you are caring for and living with someone who has Alzheimer's disease or other dementias with challenging behaviors, you may be able to participate.

Participation Includes:

- 8 weekly meetings with a specialist in dementia caregiving
- Training in behavior tracking
- Review and/or receipt of home modifying supplies
