

Can Dental Discomfort be related to your activity level?

Researchers at the University of Kentucky are inviting you to participate in a research study investigating the association between physical activity and reported discomfort following a dental procedure.

Participants will be required to make only two visits to the Dental Research Clinic. Study period is one week. Activity monitors will be provided during the study.

Participants will receive a gift card upon completion of the study.

You may be eligible to participate if you are healthy and between the ages of 18-49 years old.
